

## English

- Write a postcard/letter and send it to a local hero in the community. Think carefully about:
  - who they are helping
  - why you think they are a hero
  - why you wanted to thank them
- Write a postcard/letter to a friend or relative that you are missing whilst in lockdown. You could include:
  - funny memories
  - things you miss about them
  - what you are looking forward to doing in the future

## Grammar and Spelling

- Find out the meaning of these 5 words and then use the words accurately in a sentence:

Speculate      Scrounge      Spherical  
Manoeuvre      Shortage

## Maths

- **Shopping around game:**

### **Your challenge:**

Can you estimate the total cost of the food bill?

### **How to play:**

Find an old receipt for some shopping (you may need to ask an adult for this). Don't look at the total!

Round each price to the nearest whole pound and find an estimated total. For example, if something costs £1.48 you'd round it to £1 and if something costs £1.76 you'd round it to £2.

Calculate or find the actual total, then calculate how far away your estimate was.

## Reading

- What is your favourite book that you've read? List 3 reasons why it is a good read and why someone else should read it.
- Design a new front cover for the book—remember the front cover has to intrigue people and make them want to read it, without giving too much away!
- Write a new blurb for your favourite book. Remember a blurb must give the reader an idea of what the book is about, but can't give too much away. Try to keep it to 30 words or less.

## Creative - Darwin's Delights

- Darwin observed animals for days/ months/years in order to understand a species and understand how they are adapted for survival. Create a bird feeder or mini beast hotel for outside your house. Then observe which birds or mini beasts visit and how often. Record the data you collect in a table or graph.
- In your garden or on your daily walk, do a bird count. If you can, take pictures, then once you've finished counting find out about the different species you've seen. Look closely at the different birds - how are they adapted to survive? Did you see any of the same species but they looked or behaved different? Why might that be?
