

English

- Write a poem about the 'wishes' you want to come true after lockdown. What do you want to do? Where do you want to go? Who do you want to see?
- Write a story about a child and their pet. Who is the child? Who is the pet? Where are they? Where do they go? What goes wrong? Who helps? Where do they end up? How do they feel?
- Write a song about lockdown and perform it to your family.

Reading

- Read at least 3 books on Oxford Owl, using your login in your book.
- Read your book aloud to an adult and put on different voices for different characters to show your adult how you think the character sounds.
- Write some questions you and your adult can ask each other about the book and see who can remember the most.

Remember to check Purple Mash for 2 Do activities set by your teacher.

Maths

- Choose items around the house to estimate their length. Start with one object, then check how close you were with a ruler or tape measure. Then choose another and try to increase your accuracy.
- Choose items to weigh from around the house. Estimate their weight in grams (g). Start with one object, then weigh it to see how close you were. Then continue with different items; trying to increase your accuracy.
- Make comparisons of different lengths around the house e.g. a photo frame is shorter than the coffee table.

Creative - All things bright and beautiful

- Watch live webcam footage of bees in a bee colony as they come and go from the hive and perform their duties: <https://explore.org/livecams/honey-bees/honey-bee-hive-cam> Look closely at the bees returning to the hive to see if some appear different to others.
- Find out why and how bees make honey <https://www.bbc.co.uk/programmes/p013c6t7> Look at video footage and images of bees using their proboscis to collect nectar from flowers. See how they get covered in pollen as they feed. Identify parts of the flower that the bee collects pollen and nectar from. Draw a diagram and label it with captions to explain how bees make honey.
- Use your knowledge of camouflage and warning colours to design and make a 3-D model of a minibeast Collect and use natural materials, such as leaves, twigs and bark, and a range of craft materials, including googly eyes, pipe cleaners and coloured pom-poms.
- Move like a minibeast! Use your knowledge of how minibeasts move to practice wriggling, stretching and crawling like caterpillars and worms. Climb like spiders, slide like snails, or do the bee's waggle dance! Practice making spirals like the patterns on a snail's shell, moving clockwise.
- Research how plants disperse their seeds on the internet. Think about what you search in order to find the answers. Create a PowerPoint or information page on Word to explain the different ways plants disperse seeds.
